## **DETAILED ACTION**

### ***Response to Amendment***

1. This communication is responsive to the amendment filed on 1/27/06.

Accordingly, claims 7-10 are currently pending in this application.

2. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site <http://www.uspto.gov> in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

### ***Claim Objections***

1. Claims 7-9 are objected to because of the following informalities:

In claim 8, "The method of claim 7, wherein" shall be inserted before "said codes" and "in claim 7" shall be deleted.

Claim 8 is missing a period.

Art Unit: 2616

In claim 9, "gemenalized" shall be replaced with "generalized".

2. Claims 7, 9 and 10 are objected for failing to properly use "means for" function.

Applicant has recited a methods claim, which improperly uses "means for" function.

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 7-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification as now amended has no support from the specification as originally filed. More specifically, the additional material has no support from the specification. The added drawings do not have support from the specification as originally filed. Furthermore, Applicant has not pointed out clearly how and where the amendments are supported by the original specification.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The terms "which" and "them" should be clearly written out to indicate what the terms are referencing.

Art Unit: 2616

5. Claims 7, 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim. The statement "and for the plurality of other applications" is indefinite.
